

DECODED.

off the grid.

At Decoded we are designing a better future through better materials.

Sustainability is not a trend, it's a complete change in the way we design, think and operate.

Introducing the new recycle & biodegradable collections.

BIO.

Biodegradable Case

Introducing the beautiful and sustainable Bio Leather Case. This plastic free Vegetable tanned Leather is biodegradable yet strong enough to protect your iPhone from small bumps and falls. The Back Cover Bio Case has been meticulously designed and tested to protect your iPhone and the environment.

RECYC

Recyc Leather Detach Case

This innovative eco-friendly leather is made through smart recycling of natural fibers (leather gloves) which creates a beautiful and durable material that retains all the qualities of traditional leather. Combining both style and sustainability without compromise.

Step 1.

Old cow leather gloves are recycled and cut down to scraps.

Step 2.

Leather scraps are shredded then glued with natural rubber.

Step 3.

The reformed leather sheets are pressed and coated.

Step 4.

The leather life cycle begins again.

AIRCASE 2

AirCase2 - Biodegradable

The AirCase is handcrafted using a singular piece of Premium Biodegradable Leather. This unique one-piece construction ensures superior strength, movement and durability. Providing a secure fit with additional drop and scratch protection. The AirCase2 combines a sleek design with innovative materials to provide the most stylish, sustainable protection for your AirPods.
