#### Working Modes

##### Panning Mode

The phone is allowed to pan left or right. Vertical tilts or rolls are restricted.

##### Panning and Tilting Mode

The phone is allowed to pan left or right and tilt up and down. Rolls are restricted.

##### Lock Mode

The phone stays in its current orientation. All panning, tilting and rolls are restricted.

#### Other Functions

##### Inversion Mode

Three working modes can be switched under inversion mode. After entering into the inversion mode, the gimbal automatically switches to the panning mode. Invert the gimbal, put the camera face down to capture the wonderful moments. The gimbal can restore to the boot-up state by consecutively pressing the function button for three times under inversion mode.

## Manual Pulling Locking

After the gimbal being powered on for eight seconds, pull the tilting axis to the desired angle under non panning and tilting mode and wait for 0.5 second until the gimbal registers the new angle.

## Reset

Reset the tilting axis of the gimbal to initial orientation and initial mode.

## Standby

In standby model, keep the gimbal in power-up state, the motor stops working, the indicator light flashes for three times, and single tap again to wake the gimbal.

## 5. Ringo App

### Connect to Gimbal

Click "Connect to Gimbal" icon. Choose "YD" option in the pop-up window.

### State Tracking

Click "State Tracking" icon to activate. When this icon turns green, State Tracking mode is on. Choose the tracking object and a green rectangle will show. The gimbal will auto follow the target inside the green rectangle.

## 6. Gimbal Horizontal Angle Adjustment

The horizontal angle needs to be adjusted whenever the following situations happen to the gimbal, user can adjust the horizontal angle by gimbal initialization and joystick.

- (1) The tilt angle is not leveled with the horizontal surface.
- (2) The roll angle is not parallel to the horizontal surface.
- (3) Under lock mode, the panning angle drifts.

### Adjusting steps:

- (1) After powering the gimbal on, hold down the function button for one second to enter standby mode, and the LED indicator shall flash for three times;
- (2) Consecutively tap the function button for three times, LED indicator shall be always on, place the gimbal on a flat surface and keep it stationary;
- (3) When the initialization is completed, the LED indicator will flash for three times.

## 7. Parameters
